

Page 1: Document with Multiple Pages

This is the first page of a multi-page document.

It contains multiple sentences with proper spacing.

Each line should be counted as separate words.

Word boundaries are clearly defined with spaces.

Numbers like 123, 456, and 789 should also count.

Punctuation marks help separate thoughts.

Total words on this page should be easily counted.

Page 2: Continuing from Previous Page

This page also has normal text formatting.

Word counting should work correctly here too.

Mixed content: ABC123 def456 GHI789 works fine.

Special characters like café, naïve, and résumé
should also be handled properly by the extraction.

End of document with proper word boundaries.
